# Anaplastology

Open Access

[www.omicsonline.org](http://www.omicsonline.org)

The studies of an Anaplastology consist of the arts and sciences. Anaplastology is more concerned with the aesthetic appearance than with function when considering hand and arm prostheses and helps to analyze the mechanism behind that.

Anaplastology is an open access scientific journal which is peer-reviewed. It publishes the most exciting researches with respect to the subjects of Anaplastology development and their diagnostic applications. This is freely available online journal which will be soon available as a print.

Anaplastology not only helps researchers, clinicians and scientists, but also renders a link between clinicians, pharmacologists and also the bio-business people who study health effects in populations. Symbiosis of anaplastology are widely used in the applications in tissue engineering of bone and cartilage.

Anaplastology - Open Access uses online manuscript submission, review and tracking systems for quality and quick review processing. Submit your manuscript at

<http://www.omicsonline.org/submission>
