

Journal of Astrophysics & Aerospace Technology

Open Access

www.omicsonline.org

Astrophysics is the branch of astronomy that deals with the study of physics of universe. It deals with the study of physical properties of Celestial Bodies, Galaxies, Stars, Planets, Exoplanets, The Interstellar Medium, and Cosmic Microwave Background. Aerospace may be defined as the study of atmosphere and surrounding space. Aerospace technology includes the study of vehicles moving through air and space. Aerospace technology is a very diverse field with a congregation of commercial, industrial and military applications.

Journal of Astrophysics & Aerospace Technology under an Open Access category is a peer-reviewed journal, aims to provide the most complete, dependable and undeviating source of information on current developments in the arena of Astrophysics & Aerospace Technology. The emphasis will be on publishing quality research papers rapidly and to make freely available to researchers worldwide.

The JAAT under the open access category allows free, faster and unconstrained access to the scientific research and their results. The scientists, who needs change (or) are excited about the changes, now prefer the open access journals/publications than the routine to magnify and pass around their knowledge. JAAT encourages and also depends upon data interpretation, efforts and analysis of mathematical data. The readership includes scientists, scholars and common people.

Journal of Astrophysics & Aerospace Technology - Open Access uses online manuscript submission, review and tracking systems for quality and quick review processing. Submit your manuscript at
