# EDITORS & EDITORIAL BOARD

Antivirals and Antiretrovirals are a class of medication specifically used to treat viral and retro viral infections caused by viruses.

The main objective is to fork out the global arena for researchers in the field of Antimicrobials which have their main emphasis on Antivirals and Antiretrovirals.

The Journal of Antivirals and Antiretrovirals under an Open Access category aims to outfit the most complete, masterful source

of multifaceted information on current developments in the arena of Antivirals and Antiretrovirals.

This Journal drives to accomplish the awareness about the various viral infections, the drugs to treat them and mainly

emphasise on the innovative and contemporary path of research to have a cutting edge methods to manufacture drugs. Research in Antivirals and Antiretrovirals is a peer-reviewed and Open Access scientific journal dedicated to publish significant research work and circularizing profound knowledge of virus and retrovirus.

Journal of Antivirals & Antiretrovirals -Open Access using online manuscript submission, review and tracking systems of Editorial Manager® for quality and quick review processing. Submit your manuscript at

<http://www.editorialmanager.com/virology>
