Addiction is an obsession, compulsion and a chronic neurobiological disorder in medical terms that has dimensions towards genetic, psychological and environmental aspects. The Journal of Addiction Research and Therapy addresses both types of substance and process addictions focusing the mood altering behaviors or activities of the drug abusers, their physical dependence and psychological behavior towards therapies some of which includes aversion therapy, cover sensitization.

The Journal of Addiction Research and Therapy under open access category aims to advance our understanding of the action of drugs and their addictive processes, diagnosis, harmful effects as well as assist in prevention and treatments of addiction. The Journal of Addiction Research and Therapy is an international, peer-reviewed journal publishing an overview of human research on substance abuse which includes the contents geared towards behavioral, psychological, genetic, neuro-biological, and pharmacological aspects.

The Journal of Addiction Research and Therapy explicates the complicated aspects of addiction, psychological and most probably physical addiction despite of its detrimental consequences and increased tolerance, as deemed by the drug addict himself to his individual health, mental state and unmanageable life style. The Journal is promptly available, and is freely accessible globally through internet to share the innovations of the researchers for scholarly advancement in this field.

Journal of Addiction Research & Therapy - Open Access uses online manuscript submission, review and tracking systems for quality and quick review processing. Submit your manuscript at
