

Journal of Bioequivalence & Bioavailability

Open Access

www.omicsonline.org

Bioequivalence & Bioavailability focuses and concentrates on the release of a drug substance from its dosage form and subsequent absorption into the systematic circulation. For this reason, similar approaches to measuring bioavailability should generally be abide by and followed in demonstrating bioequivalence.

Journal of Bioequivalence & Bioavailability provides an immediate Open Access to its content making research freely available to the public which supports a greater global exchange of knowledge in the chemical and pharmacological areas.

Journal of Bioequivalence & Bioavailability provides latest practical technology at faster rates to the readers of various categories i.e. scientists, experts, research scholars, administrators, extension workers, private organizations for application of organic and eco-safe usage of various drugs in the field of pharmacy and biochemistry.

Journal of Bioequivalence & Bioavailability - Open Access uses online manuscript submission, review and tracking systems for quality and quick review processing. Submit your manuscript at

<http://www.omicsonline.org/submission>
