

Journal of Drug Metabolism & Toxicology

ISSN:2157-7609

Open Access

www.omicsonline.org

The Journal of Drug Metabolism & Toxicology deals with the biochemical modification of pharmaceutical substances, which includes action of body on the drug and action of drug on the body . It also deals with the study of adverse effects of chemicals on living organisms, usually through specialized enzymatic systems.

The Journal of Drug Metabolism & Toxicology (JDMT) under open access category aims to advance our understanding of the action of drugs and their addictive processes, diagnosis, harmful effects as well as assist in prevention and treatments of addiction. The Journal of Drug Metabolism & Toxicology is an international, peer-reviewed journal publishing an overview of human research on substance abuse which includes the contents geared towards behavioral, psychological, genetic, neuro-biological, and pharmacological aspects.

The Journal of Drug Metabolism & Toxicology explicates the complicated aspects of addiction, psychological and most probably physical addiction despite of its detrimental consequences and increased tolerance, as deemed by the drug addict himself to his individual health, mental state and unmanageable life style. The Journal is promptly available, and is freely accessible globally through internet to share the innovations of the researchers for scholarly advancement in this field.

Journal of Drug Metabolism & Toxicology - Open Access uses online manuscript submission, review and tracking systems for quality and quick review processing. Submit your manuscript at
