# EDITORS & EDITORIAL BOARD

The Journal of Marine Science: Research and Development emphasizes the geological, physical, chemical, and biological aspects of marine environment and its boundaries with the sea floor and atmosphere.

The Journal of Marine Science: Research and Development is an international, peer-reviewed journal which includes the publication of original scientific research on the study of ocean environment and under water minerals. The Journal of Marine Science: Research and Development under Open Access Category illustrates the diverse topics, including marine organisms, ecosystem dynamics, ocean currents, waves, and geology of sea floor; reflects multiple disciplines that ensures oceanographers to further interpret the processes within the world ocean.

The Journal elaborates the development of new technologies for underwater surveillance, solutions for methodological problems occurring in sophisticated oceanography, marine corrosion and biofouling to understand special oceanographic features in order to achieve progress in marine science.

Journal of Marine Science: Research & Development -Open Access using online manuscript submission, review and tracking systems of Editorial Manager® for quality and quick review processing. Submit your manuscript at
