

Journal of Plant Pathology & Microbiology

Open Access

ISSN: 2157-7471

www.omicsonline.org

Plant pathology also called as phytopathology is the scientific study of plant diseases caused by pathogens which are nothing but infectious diseases and environmental conditions and some other physiological factors.

Journal of Plant Pathology & Microbiology is a peer-reviewed Open Access scientific journal dedicated to publish significant research in the form of full-length papers and review articles on virology, mycology, bacteriology, physiological-plant pathology, plant-parasite interactions, disease epidemiology and modeling post-harvest diseases, non infectious diseases, plant protection and crop management techniques.

Journal of Plant Pathology & Microbiology is a refereed, scientific journal in which the acceptance criteria for all papers are the quality and originality of the research and its significance to our readership. The readership includes scholars and researcher in the field of Plant Pathology and Plant Microbiology.

Journal of Plant Pathology & Microbiology- Open Access uses online manuscript submission, review and tracking systems for quality and quick review processing. Submit your manuscript at

<http://www.omicsonline.org/submission>
