BIOGRAPHY

- Feng Yang, M.D., Ph.D. graduate from Shanghai Medical College of Fudan University and work in Department of Pancreatic Surgery at Huashan Hospital in Shanghai, China.
- He work as a scientist on several projects funded by the National Natural Science Foundation of China. He published several articles mainly focused on pancreatic tumors and nanotechnology for pancreatic cancer diagnosis & therapy. He am a reviewer for several international journals.

Research interests

- Research interests are
- Nanotechnology for pancreatic cancer diagnosis and treatment,
- surgery for pancreatic tumors.

Nanotechnology for pancreatic cancer diagnosis and treatment,

ANATOMY OF PANCREAS

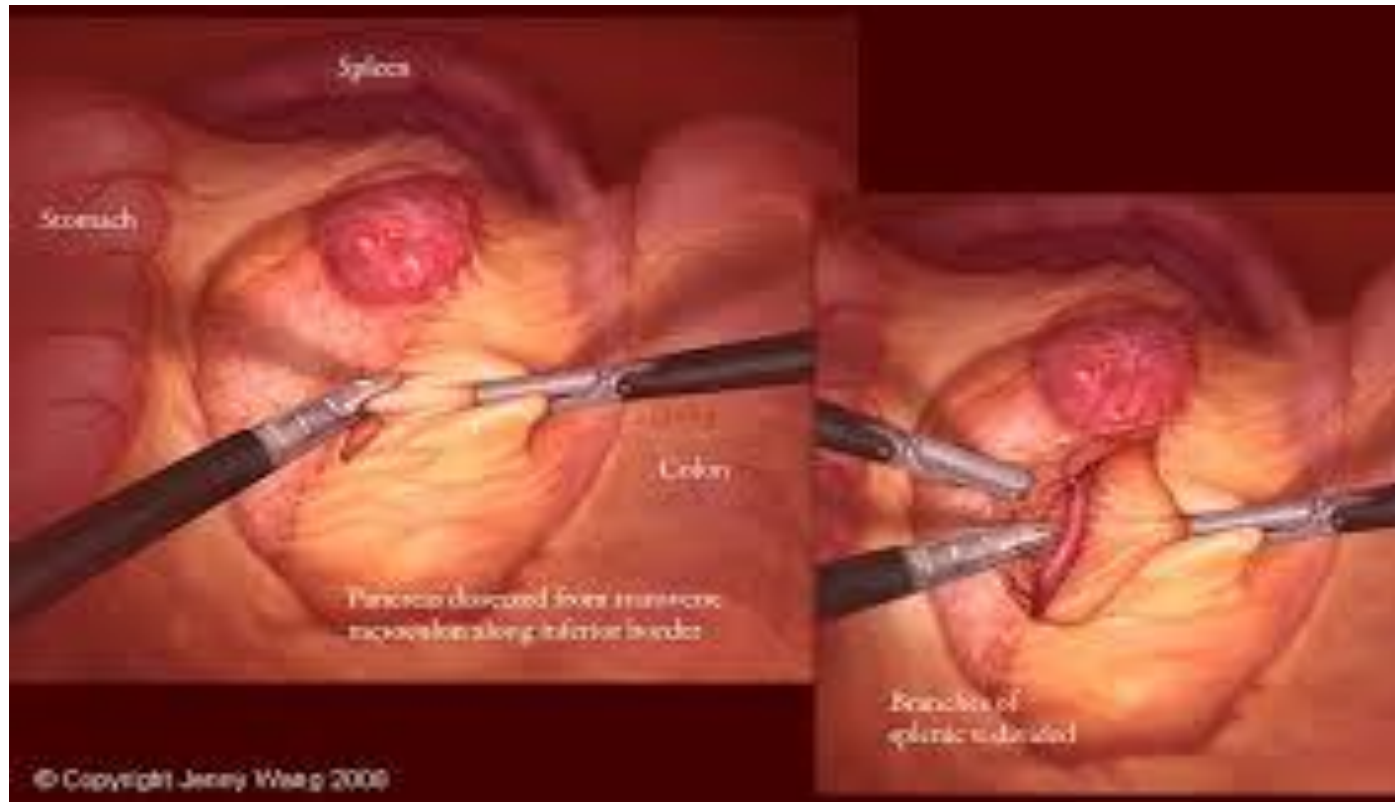

CROSS SECTION OF PANCREAS CANCER CELLS

Pancreatic cancer occurs when cancer cells develop from the pancreas, a glandular organ located behind the stomach. Signs and symptoms of pancreatic cancer may include abdominal or back pain, yellow skin, unexplained weight loss, light colored stools, dark urine and loss of appetite. Early on there are usually no symptoms. Symptoms that are specific enough to suspect pancreatic cancer often do not appear until the disease is already in an advanced stage. By the time of diagnosis the cancer has usually spread to other parts of the body.

PANCREATIC TUMOR SURGERY
