

# OMICS INTERNATIONAL

OMICS International through its Open Access Initiative is committed to make genuine and reliable contributions to the scientific community. OMICS International hosts over **700** leading-edge peer reviewed Open Access Journals and organizes over **1000** International Conferences annually all over the world. OMICS International journals have over **10 million** readers and the fame and success of the same can be attributed to the strong editorial board which contains over **50000** eminent personalities that ensure a rapid, quality and quick review process. OMICS International signed an agreement with more than **1000** International Societies to make healthcare information Open Access.

# OMICS Journals are welcoming Submissions

OMICS International welcomes submissions that are original and technically so as to serve both the developing world and developed countries in the best possible way.

OMICS Journals are poised in excellence by publishing high quality research. OMICS International follows an Editorial Manager® System peer review process and boasts of a strong and active editorial board.

Editors and reviewers are experts in their field and provide anonymous, unbiased and detailed reviews of all submissions. The journal gives the options of multiple language translations for all the articles and all archived articles are available in HTML, XML, PDF and audio formats. Also, all the published articles are archived in repositories and indexing services like DOAJ, CAS, Google Scholar, Scientific Commons, Index Copernicus, EBSCO, HINARI and GALE.

Open Access

ISSN: 2167-7719

- Dr. Sublett is the Founder and Chairman of AllergyZone LLC, a company dedicated to developing products for the relief of allergy and asthma. He is an expert on the effects of air pollution on human health, especially related to indoor air pollution resulting from both outdoor and indoor sources, including diesel particulates, PM<sub>2.5</sub> and biological sources for allergens such as cockroach and mouse. He also has an interest in the inter-relationship of building science and indoor airpollution. He is a frequent invited lecturer on medical socio-economics, allergy, asthma and indoor environmental issues and has a special research interest on the effectiveness of air filtration. He is married and has four grown children and lives in Anchorage, KY.
