Projects

[Drinking Habits Among Industrial Workers - A Case Study of Ludhiana City\(Link\)](#)

January 1984 – January 1985 It was a study made on primary data that assessed the causes and effect of liquor consumption on humans. The recommendations were advanced in the study how the habit of drinking can be overcome. So far, the study does not have a link. The link will be provided in due course of time as the study was done in 1983-85 and the project report is lying in the library of Punjab Agricultural University, Ludhiana. At present, I am concentrating on re-starting the Institute for which the philanthropic contributors are welcome.
