SHAZIA JAMSHED

Editor PPT

- Shazia Qasim Jamshed, PhD, is an Assistant Professor in the Department of Pharmacy Practice, School of Pharmacy, International Islamic University Malaysia (IIUM). She did her Bachelors of Pharmacy (BPharm) in 1992 and Master of Philosophy (MPhil) in 1995 from the University of Karachi, Karachi, Pakistan. She earned her PhD from Universiti Sains Malaysia on the contemporary issues surrounding generic medicine use among healthcare professionals and future practitioners. Dr Shazia is a faculty at IIUM since 2012. Previously she worked in International Medical University (lecturer) and Universiti Sains Malaysia (fellow researcher). Prior to her PhD she worked in different medical and pharmacy schools in Pakistan and as well as in India.
- Dr Shazia's primary research interest mainly encompasses generic medicine utilization, pharmacy education and practice-based research. Over the past two years she worked on the issues associated with care perspectives in oral health, Alzheimer's disease, alternative therapies, self-medication practices, etc.
- In terms of scholarship Dr Shazia has published extensively in peer-reviewed journals, periodicals and newspapers. She shared her research work through more than 20 oral and poster presentations around the globe. She authored two book chapters titled "Introduction to Social Pharmacy" (Elsevier) and "The Pharmaceutical Industry, Intellectual Property Rights and Access to Medicines in Pakistan" (McMillan and Palgrave). She has received 7 internal research grants to conduct research in different areas of pharmacy education. She is invited by the University of Peradeniya, Sri Lanka to be on the board of supervisors for undergraduate pharmacy and nursing research. She is currently supervising and co-supervising two PhD, two masters and 20 undergraduate students.

Recent Publications

Pharmacy Practice

- The traditional role of pharmacists is to manufacture and supply medicines.
- More recently, pharmacists have been faced with increasing health demands which change their direction and focus to PATIENTS instead of the Product.

Introduction

- The practice of pharmacy is a vital part of a complete health care system.
- The number of people requiring health care services has steadily increased, and this trend will likely continue.
- pharmacy will face new challenges, expanded responsibilities, and an ever-increasing growth in opportunities.

Professional Prospects

Issues that our Profession will face

- increases in average life span
- the increased incidence of chronic diseases;
- the increased complexity, number, and sophistication of medications and related products and devices;
- increased emphasis on primary and preventive health services,

- home health care, and long term care;
- concerns about improving patients' access to health care, controlling its cost, and assuring its quality.

Because of the large role that medications and their proper use play throughout these issues, pharmacists will play an important part in the future of health care.

**Issues that our Profession will
face**

Definition

Pharmacy Practice is the discipline within Pharmacy that involves developing the professional roles of the pharmacist.

- Pharmacy Practice is vital, since it facilitates and enables pharmacists to fully exploit their substantial knowledge and expertise in areas such as pharmacology, pharmaceuticals, chemistry and therapeutics within a clinical context.

- The practice of pharmacy aimed at providing and promoting the best use of drugs and other health care services and products, by patients and members of the public.
- It requires that the welfare of the patient is the pharmacist's prime concern at all times.
