

# Dentistry

ISSN: 2161-1122

[www.omicsonline.org](http://www.omicsonline.org)

Dentistry is the art and science of prevention, diagnosis, and treatment of conditions, diseases, and disorders of the oral cavity, the maxillofacial region, and its associated structures. The journal provides new approaches at a high standard of quality in all disciplines involved in the field of dentistry and clinical and molecular studies related to oral health, disease, and dental implants.

Journals under an Open Access category projects a comparatively new model for scholarly journal publishing that provides straight away, worldwide, barrier-free access to the full-text of all published articles. Dentistry is an Open Access, peer-reviewed, online journal that addresses the study, diagnosis, prevention and treatment of diseases, disorders and conditions of the oral cavity.

Dentistry functions as an educational resource for patients about oral hygiene and ways to preserve a healthy mouth and prevent dental problems. Reviews of these articles will help clinicians to learn and share their experiences and understand the advances in this area. Moreover, this journal is Open Access, and the content is free and promptly available; allowing scientists, physicians and students around the globe to share their research and innovations for the advancement of this area.

Dentistry - Open Access uses online manuscript submission, review and tracking systems for quality and quick review processing. Submit your manuscript at
