# **Journal of Marine Science: Research & Development**

*Open Access*

**[www.omicsonline.org](http://www.omicsonline.org)**

The Journal of Marine Science: Research and Development emphasizes the geological, physical, chemical, and biological aspects of marine environment and its boundaries with the sea floor and atmosphere. Marine science explores the scientific study of oceans and seas, also called as oceanography.

The Journal of Marine Science: Research and Development is an international, peer-reviewed journal which includes the publication of original scientific research on the study of ocean environment and under water minerals. The Journal of Marine Science: Research and Development under Open Access Category illustrates the diverse topics, including marine organisms, ecosystem dynamics, ocean currents, waves, and geology of sea floor; reflects multiple disciplines that ensures oceanographers to further interpret the processes within the world ocean.

The Journal of Marine Science: Research and Development renders the articles of most reliable information which is beneficial for researchers or oceanographers to focus their application of interdisciplinary knowledge, skills, and abilities to the advancement in the field of marine science.

Journal of Marine Science: Research & Development - Open Access uses online manuscript submission, review and tracking systems for quality and quick review processing. Submit your manuscript at

<http://www.omicsonline.org/submission>
