# Journal of Pharmacogenomics & Pharmacoproteomics

Open Access

Pharmacogenomics aims to develop coherent means to modify drug therapy, with respect to the patients genotype, to ensure maximum efficiency with minimal contrary effects. Pharmacoproteomics is the "all-encompassing" analysis of the protein complement of the genome of an organism, which has become an increasingly important discipline for the identification of disease targets and drug designing.

Journal of Pharmacogenomics & Pharmacoproteomics (JPP) under Open Access category is peer-reviewed, freely available, easy to access, reliable and efficient source to spread the divine knowledge of researchers in the field of biotechnology, pharmacy, bioinformatics and other life science areas.

Journal of Pharmacogenomics & Pharmacoproteomics (JPP) would address the issues and provide the reader with the essentials of the science and theory behind these disciplines, also giving practical applications of various methods for better understanding of modern drug design and development.

Journal of Pharmacogenomics & Pharmacoproteomics - Open Access uses online manuscript submission, review and tracking systems for quality and quick review processing. Submit your manuscript at

<http://www.omicsonline.org/submit>

## Editors & Editorial Board

**Shufeng Zhou**  
University of South  
Florida, USA

**Victor P. Andreev**  
University of Miami
