**Subject:** Recommendations for the Indexing of 'Journal of Clinical Toxicology' in PubMed Central

Dear Sir,

*Journal of Clinical Toxicology, an Open Access Journal, is providing a unique opportunity to the clinicians, researchers and academia to publish their basic and applied research in the diversified areas toxicology and associated disciplines. The Journal is concerned all aspects of toxicology of drugs, chemicals including pesticides, indigenous drugs, epidemiological aspects covering human beings, animals, environmental sciences, etc. The journal publishes original research, review and general articles besides opinions, comments, news-highlights, case studies and letters to editor.*

*In order to ensure the quality publication, all the manuscripts passed in internal review are subject to peer review by at least two external experts in the area of manuscript. Journal has online manuscript submission, review and editorial tracking systems. As a quality policy to provide the rapid publication, manuscripts number is given within 72 hours and corresponding author received first decision within 25 days of the submission of the manuscript. Total timeline of processing from submission to publication is 45 days. The journal is improving day by day in terms of quality publications and has created iconic presence among the contemporary journals in the area.*

*Being one among the "Executive Editors" of this Journal, I consider myself the most competent person to comment on the credibility and accelerated growth of the journal. I do believe that the credibility of the Journal will further enhance, if universally accepted indexing system like, PubMed Central support it by registering for Indexing.*

*I am putting my highest recommendations to the 'Journal of Clinical Toxicology' for indexing in PubMed Central. The Journal staff and editorial board members have worked very hard for the journal to establish its high professional standing.*

With warm regards,

Sincerely yours,

AB Pant

To,
