Object : Indexing the Journal of Alzheimer's Disease and Parkinsonism in PubMed.

Lens, July 18th 2013

To whom it may concern.

The *Journal of Alzheimer's disease & Parkinsonism* (ISSN: 2161-0460) is an open access journal with a worldwide readership allowing a large and free diffusion of the results and therefore reinforcing the impact of published work. High quality of members of the editorial board provides efficient and rapid peer review process.

Since 2011, the editorial board members and journal staff have worked very hard for the journal to establish its high professional standing. Because the journal is constantly improving and is running ahead with better and many quality publication, and because I am a member of the Editorial Board for the *JADP* and a published author of this journal, I would like to strongly recommending to be indexed in PubMed.

Best regards,

Dr GOSSELET
