Re. PubMed listing, Journal of Clinical and Experimental Cardiology

To whom it may concern,

I am writing in support of the application of the *Journal of Clinical and Experimental Cardiology (JCEC)* for PubMed listing.

By way of introduction, I am Associate Professor at Hannover Medical School, and Director of the Pediatric Pulmonary Hypertension Program. Previously, I held faculty positions at the Charité Medical School, Berlin, and at Harvard Medical School, Boston, USA.

The JCEC had been launched about 2 years ago as open access journal. The journal quickly gained broad acceptance in the field. I was asked to join as editorial board member and have been the Special Issue Editor of „Congenital Heart Disease : Recent Discoveries and Innovations.“

<http://www.omicsonline.org/ArchiveJCEC/SpecialissueJCEC-S8.php>

This special issue contains 11 articles and 1 editorial, has been written by world-renown experts such as Dr. Stephen Sanders, Children's Hospital Boston, and as such, was very well received.

Please do not hesitate to contact me if there are any remaining questions or concerns.

With kind regards,

Georg Hansmann, MD, PhD
