Letter of Recommendation for Journal of Blood Disorders & Transfusion

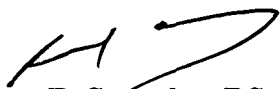

It is with utmost respect for thoroughness in scientific process and peer review that I recommend the Journal of Blood Disorders and Transfusion for indexing in Pub Med.

A member of the editorial board of the journal I can attest to the quality of work and rigor of peer review undertaken by the Journal of Blood Disorders & Transfusion. The editorial board members and journal staff have worked very hard to establish the journal's high professional standing.

I highly recommend the Journal of Blood Disorders and Transfusion to be indexed in the Pub Med.

Thank you.

Sincerely,

Gustavo F. Gonzales, DSci, M.D.
