Letter of Recommendation for Journal of Blood Disorders & Transfusion

It is with utmost respect for thoroughness in scientific process and peer review that I recommend the Journal of Blood Disorders and Transfusion for indexing in Pub Med.

As member of the editorial board I can attest to the quality of work and rigor of peer review undertaken by this journal. The editorial board members and journal staff have worked very hard to establish the journal's high professional standing.

I highly recommend the Journal of Blood Disorders and Transfusion to be indexed in the Pub Med.

Thank you.

Sincerely,

Jochebed Ade-Oshifogun, PhD, RN, CNE, CCRN.
