Re: Journal of Carcinogenesis and Mutagenesis

Dear Colleagues,

I strongly recommend that the Journal of Carcinogenesis & Mutagenesis be indexed in PubMed Central. The Journal staff and editorial board members have worked very hard to establish its high professional standing and the Journal has been publishing high-quality papers of interest to the broad scientific community. Thank you very much.

A handwritten signature in black ink, appearing to read 'JAD', with a long horizontal flourish extending to the right.
