July 19, 2013

To whom it may concerns:

I am pleased to recommend the journal of Metabolomics (Open Access) to be indexed in PubMed, which I believe will benefit the field of Metabolomics. As we all agree, Metabolomics is a new but fast developing field, which play important role in biology, medicine, drug research and development, etc. This Journal is the voice of the society of Metabolomics; it deserves to be heard broadly.

Sincerely

Changhong Li, MD. PhD
