RE: Letter of Consent for Indexation- OCR

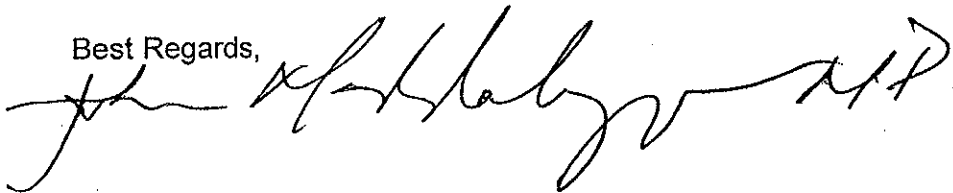

To Whom It May Concern:

The Otolaryngology Open Access journal continues to publish the most complete and reliable source of information on the discoveries and current developments in the mode of original articles, review articles, case reports, and short communications worldwide. This journal includes an array of disciplines that create a platform for the authors to contribute to the advancement of health care as well as the continued success of the journal. Our goal is to maintain growth, partnership, and opportunities that will consistently keep our publication thriving. Thus, I highly recommend that our journal be indexed in PubMed.

If you have any questions, please don't hesitate to contact me.

Thanks in advance for your time and acknowledgement of this publication.

Best Regards,

John Maddalozzo, MD
