Dear Sir or Madam,

I am writing this letter in order to recommend the Journal of Genetic Syndromes & Gene Therapy as a journal which should be indexed in PubMed. The Journal of Genetic Syndromes & Gene Therapy has a wide international auditorium of the readers and is well recognized. This journal has an open access and is scientific peer-reviewed. The scope of the journal of Genetic Syndromes & Gene Therapy includes but not limited to reports on birth defects, genetic variations linked to diseases, genetics of complex disease, management/intervention of genetic diseases and novel therapies for genetic disorders. The Journal of Genetic Syndromes & Gene Therapy publishes high significance and quality scientific manuscripts that meet high international professional standards. This will be obvious if one consider the fact that this journal has unofficial impact factor 5.89. The editorial board members and journal staff have worked very hard for the journal to establish its high professional standing and therefore I am recommending this journal to be indexed in PubMed.

Sincerely,

Marina Gorbatyuk, Ph.D
