To Whom It May Concern:

As a member of the editorial board of the *Journal of Genetic Syndromes & Gene Therapy* (JGSGT), I highly recommend this journal to be indexed on PubMed. The field of gene therapy is so important having wide readership and utility, that this journal has published excellent papers on this topic, and therefore, deserves to be indexed in PubMed. The editorial board members and journal staff have worked extremely hard to establish this journal and its high professional standing. Therefore, we are recommending this journal to be indexed in PubMed.

Sincerely,

A handwritten signature in black ink that reads "Nancy Smyth Templeton". The signature is written in a cursive style with a long horizontal flourish extending to the right.

Nancy Smyth Templeton, Ph.D.
