RECOMMENDATION LETTER

The journal *Advances in Robotics & Automation* continues improving the quality of the scientific and technical publications. The editorial board members and journal staff have worked very hard for the journal to establish its high professional standing.

I appreciate this effort and the achieved results. For this reason I recommend to include the journal *Advances in Robotics & Automation* in your reputed indexing platform.

Yours faithfully

Professor of Robotics at University of Genova

Director of PMARlab Laboratory of design and measures for robots and automation

President of SIRI Italian Association of Robotics and Automation

President of IIS Italian Welding Institute
