Re: *Journal of Anatomy and Physiology* PubMed indexing

Dear Sir/Madam:

I am writing this letter to express my strong support on behalf of the journal of *Anatomy and Physiology* to get indexed in PubMed. *Anatomy and Physiology* includes a wide range of fields in its discipline to create a platform for the authors to make their contribution towards the journal. It is an Open Access journal and aims to publish most complete and reliable source of information on the discoveries and current developments in the mode of original articles, review articles, case reports, short communications, etc. in all areas of the field and making them freely available through online without any restrictions or any other subscriptions to researchers worldwide. *Anatomy and Physiology* uses the Editorial Tracking System for online manuscript submission, peer-reviewing and tracking that enhances quality of publications. Review processing is performed by the editorial board members of *Anatomy and Physiology* or outside experts; at least two independent reviewers approval followed by editor approval is required for acceptance of any citable manuscript. Authors submit manuscripts and track their progress through the system, hopefully to publication. Reviewers can download manuscripts and submit their opinions to the editor. Editors can manage the whole submission/review/revise/publish process.

As an active reviewer, I believe that indexing of the journal in PubMed will enhance its significance for researchers and professionals working in biomedical research and clinical medicine.

Thank you for the attention given to this matter, and feel free to contact me if deemed necessary.

Sincerely,

Sabzali Javadov, MD, PhD
Member of Editorial Board, journal of *Anatomy and Physiology*
Associate Professor,
