Sub: Indexing in PubMed

Greetings,

The Journal of Anatomy & Physiology: Current Research is an Open Access journal aimed to publish comprehensive original and review articles, case reports, short communications, etc. in all areas of the field of Biology and Medicine.

The journal publishes articles after peer reviewing by editorial board members or at least two expert reviewers in the field followed by editor's approval. Because of this rigorous review process the journal is publishing quality articles and elevating its standard to the higher levels. In addition, the editorial board members and journal staff have worked very hard for the journal to establish its high professional standing and there by recommending this journal to be indexed in PubMed.

With your enthusiastic support, I hope the journal will be indexed in PubMed very soon.

With regards,

Utpal Sen, Ph.D.
Assistant Professor of Physiology and Biophysics
