To Whom It May Concern

8 August 2013

I am writing to support the Journal of Clinical and Experimental Cardiology to be indexed in PubMed. As a researcher in medical imaging science, I have access to many imaging research journals, and I find Journal of Clinical and Experimental Cardiology provides cutting-edge research information on cardiovascular disease and it is also very educational at the same time.

Journal of Clinical and Experimental Cardiology is one of the few influential journals dedicated to research on both clinical and experimental investigation of cardiovascular disease. Meanwhile, the international diversity of the authorship enables readers to look at recent cardiac research from a world perspective.

Journal of Clinical and Experimental Cardiology is a free, open access journal that dedicates to cardiac research for clinical and experimental applications. I highly recommend it to all experts who are interested in cardiology worldwide.

Thank you very much.

Yours sincerely

Dr Zhonghua Sun
Associate Professor of Medical Imaging
