To Whom It May Concern:

This letter is for expressing my support to *Journal of Bioremediation & Biodegradation* to be indexed in PubMed.

I am a member of editorial board and Editor for the special issue Phytoremediation of Environmental Pollutants of this journal. *Journal of Bioremediation & Biodegradation* was founded in 2010. It aims to “publish the most exciting researches with respect to the subjects of bioremediation and biodegradation; and to provide a rapid turn-around time possible for reviewing and publishing, and to disseminate the articles freely for research, teaching and reference purposes”. *Journal of Bioremediation and Biodegradation* explicates the containment, cleanup process, treatment or recovery process. The journal is promptly available, and is freely accessible globally through internet to share the innovations of the researchers for scholarly advancement in this field.

During the past 3 years, this journal has published many wonderful scientific papers and has a wide audience. In order to serve more people and increase popularity of this journal, I strongly recommend this journal to be indexed in PubMed.

Sincerely,

Guangshu Zhai
