Hair loss management

Tracie Radford
Certified Trichologist, USA

This presentation is an overview of many types of hair loss and scalp problems that are seen in the practice of Trichology and how they relate to the practice of Cosmetology. Some of the types of hair loss and scalp problems we will address are male and female androgenetic hair loss, alopecia areata, traction alopecia, cicatricial alopecia, seborrheic dermatitis and psoriasis. As it relates to trichology the use of natural supplements, vitamins, minerals, amino acids and in some cases pharmaceutical drugs, light therapy, stress management and a balanced diet to manage and treat hair loss will be discussed.

Biography

Tracie Radford has been in the beauty industry for over 20 years. She received her training in cosmetology from Riverside Community College. She graduated from RCC with an Associate of Science Degree in Cosmetology. After being licensed as a cosmetologist, she opened 'Make It Happen Private Salon'. With a single web search on hair loss she embarked on a new journey that would lead her to training to become a Certified Trichologist. She enrolled in International Association of Trichology under the direction of one of the leaders in the hair loss industry David Salinger from Sydney, Australia.
