

5th International Conference on

Earth Science & Climate Change

July 25-27, 2016 Bangkok, Thailand

Geodynamic zones as receptors of solar and techno pathogenic influences on living systems: Possible ways to neutralize biopathogenic radiation

A R Pavlenko

Open International University of Human Development "Ukraine", Ukraine

Techno pathogenic effect - a set of factors and processes that have any kind of negative effect or impact on living organisms resulting from scientific and technological progress of mankind. In our work we focus on the part of our accumulated material on the subject, illustrate a further impact of base stations of mobile phones on a living through the geodynamic zones and geopathogenic zones of the Earth. Geodynamic zone of the Earth are solar receptors and techno pathogenic influences. The components of the vortex of solar radiation affect the Earth and have a significant impact on the change in the electron emission devices mark the transition from the sunlit side of the Earth in shadow. The Sun during the day irradiates extensive ultra high flow Earth, and at night on the shaded side of the Earth stream is the result of the interaction of solar radiation vortex with the core of the Earth. It was determined that the installation of masts base stations and wind turbines at the intersection of the fault zones, which is a natural migration of groundwater, or geopathogenic zone, causes the appearance of artificial radiation of these zones and the spread of radiation occurs along areas faults or discontinuities along the axial in the soil. Constant exposure to natural and artificial radiations can cause changes in behavior, the state of aggression or depression (sometimes to the point of suicide), constant fatigue, sleep problems, partial loss of memory, problems with concentration, stress. All electronic devices generate like natural cosmogenic fields- technical «torsion fields». Large amount of free radicals produces in the body under their influence. To prevent a negative impact on the living need to harmonize the physical vacuum. The action of these harmonization devices is based on the elimination of the asymmetry of physical vacuum components. Simple harmonizing device consists of several elements, which were recorded the left and right torsion fields before. We have developed the device of the physical vacuum harmonization. When the device is a plug in the powerline network the physical vacuum is harmonized. It is necessary to pay much attention to theoretical issues of influence of technical torsion fields on the human body and alive and biomedical research, one of the main areas of the study natural and technical torsion fields must be brought to a new level.

Biography

A R Pavlenko has completed his PhD from Sevastopol Polytechnical Institute. He is the Director of "Spinor International", Head of the Laboratory of the Electron Devices chair at Kiev Polytechnical Institute. He has published more than 50 papers in reputed journals and has been serving as a Member of the Editorial Boards of a scientific periodical: *Ukrainian Journal Physical vacuum and Nature*.
