

3rd International Conference on Gastroenterology & Urology

July 28-30, 2014 DoubleTree by Hilton Hotel San Francisco Airport, USA

Maxwell M Chait

Columbia University College of Physicians and Surgeons, USA

Extraordinary advances in hepatology

There have been extraordinary advances in the field of hepatology. Effective therapies for hepatitis B and C have been developed that continue to evolve with remarkable success. Alcoholic liver disease remains a major health problem and nonalcoholic fatty liver disease (NAFLD) has become a health problem of epidemic proportions. Approaches continue to be developed to manage the complications of cirrhosis and hepatocellular carcinoma. Liver transplantation has evolved to a standard therapy for end-stage liver disease. This conference will offer cutting edge technology presentations on recent advances in hepatology.

Biography

Maxwell M Chait completed his MD degree at the age of 25 from the University of California, School of Medicine at San Francisco. He is a Fellow of several prestigious organizations, including the American College of Physicians, American College of Gastroenterology, American Gastroenterological Association and the American Society for Gastrointestinal Endoscopy.
