Workshop on Onconephrology

Nephrologists worldwide are increasingly facing kidney diseases encountered in cancer patients especially with the development of new innovative cancer therapies and new management protocols add more challenges faced by nephrology team in oncology ward. In our workshop we will introduce onconephrology and in case scenarios will try to address the common problems faced by nephrologists in oncology ward and how to cooperate with the oncology team to manage such cases.

Following topics will be discussed in the workshop:

- Kidney toxicity of the new chemotherapeutics
- Tumour lysis syndrome
- Hypercalcemia of malignancy
- Paraproteinemias and the myeloma kidney
- Tumour or chemotherapy induced thrombotic microangiopathy
- Dosing of chemotherapeutics in chronic kidney disease patients
