On inverse problem of Choquet integral

Zeshui Xu
Sichuan University, P. R. China

The Choquet integral is a popular tool for dealing with multiple criteria decision making. In practice, if we have a fuzzy measure on the set of criteria, we can use Choquet integral to rank alternatives. In this paper, we consider the inverse problem of Choquet integral: Given a ranking of alternatives, does there exists a fuzzy measure by which we can get the ranking through Choquet integral?
