European perspective on nutraceuticals

The perception of being healthy is changing in European consumer. It is evident that consumers are taking conscious steps not only to become healthy but also age healthy, prevent illness and look radiant. In Europe, the health trend and societal changes are leading to a growing demand for natural ingredients for health products. Use of alternative medicine and in particular food supplements continue to increase. Sustainability is still a strong trend, demanded by European companies as well as consumers. Such focus on healthy lifestyle is a boon for natural ingredients, alternative medicines and food supplements manufacturers around the world. However, stringent European regulation and consumers demand for best quality products makes it challenging for manufacturers. The talk will mainly focus on current and future trends on European policies, consumer mindset, important health sectors, growth opportunity and manufacturer's roles and responsibility
