Faradarnani as an unprecedented complementary and alternative medicine

Ali Firouzmand Shahgoli
Urmia University, Iran

Faradarnani (Fara-therapy), a recently introduced Iranian complementary and alternative medicine (founded by Mohammad Ali Taheri) is based on the theory of 'Consciousness Bond' or ' Constituents having Consciousness in Common'. According to this theory, when a link is established between the Interuniversal Consciousness or Cosmic Internet (as the whole consciousness) and human (as the constituent consciousness), the consciousness bond will be formed, subsequently, the whole consciousness via the consciousness distribution management center of the human's mind is capable of correcting, repairing and curing the consciousness of constituents including the mind, psyche and body, thus healing and recovery takes place. Establishing such connection (a meaningful resemblance to a connection between human and cosmic internet in order to update the human softwares through the Creators website) brings about results that man is not capable of attaining singlehandedly and through his own abilities. As a qualitative method of treatment, Faradarnani recognizes the essence of man and takes action to improve the condition of the patient without any kind of intervention in the quantitative process of treatment (classic conventional medicine) or any hardware manipulation. This treatment method can be effective for treating all kinds of illnesses including congenital or genetic, dysfunctional organs, infectious diseases, mechanical dysfunctions, old age and exhaustion, mental, psychological, psycho-somatic and mento-somatic disorders (involves mind (mental) and body (soma)) and chronic or acute illnesses, since it is the divine intelligence who indeed carries out Faradarnani. Thus the Faratherapist cannot consider any kind of disease as incurable or attribute anything (power of healing) to himself. As a matter of fact, Faradarnani embraces all human beings, everybody regardless of their race, nationality, religion and personal beliefs can accept its theoretical part and experience and make use of its practical aspect.
