

2nd International Conference on

Restorative Dentistry and Prosthodontics

May 01-02, 2017 Toronto, Canada

The bone renaissance

Mahmood Qureshi

MQI - International Institute of Implant & Reconstructive Surgery, Pakistan

In a relentless pursuance of perfection and a definitive solution for long term stability of tissues around implants, the author will present an exceptional concept - the 'Bone Renaissance', a unique philosophy encompassing the sequential and codified reversal of the bone back to its original 3-D Engineered Divine Osseo-architecture by incorporating the 5 in 1 modus operandi: 'SABIRIN', Stable Alveolar Bone Implant Reconstructive Integration Naturally, a major paradigm shift in re-establishing the natural spiritual union of the form and function. The SABIRIN components resurrect the lost contours of the hard and soft tissues with a long-term, esthetic predictability. The refurbishment of patients to innate curve, contour, aesthetics and function is achieved by using SABIRIN components: Bone Renaissance Implant placement with specially designed osteotomes (rotary & manual), growth factors and soft tissue manipulation. Vascularized osteotomies, sinus grafts, and on lay grafts. Based on the 25 years of experience, the presenter thoroughly discusses the rationale, gives practical guidelines and presents surgical maneuvers to rectify hard and soft tissue deficiencies.
