

OMICS INTERNATIONAL

OMICS International through its Open Access Initiative is committed to make genuine and reliable contributions to the scientific community. OMICS International hosts over **700** leading-edge peer reviewed Open Access Journals and organizes over **1000** International Conferences annually all over the world. OMICS International journals have over **10 million** readers and the fame and success of the same can be attributed to the strong editorial board which contains over **50000** eminent personalities that ensure a rapid, quality and quick review process. OMICS International signed an agreement with more than **1000** International Societies to make healthcare information Open Access.

OMICS Journals are welcoming Submissions

OMICS International welcomes submissions that are original and technically so as to serve both the developing world and developed countries in the best possible way.

OMICS Journals are poised in excellence by publishing high quality research. OMICS International follows an Editorial Manager® System peer review process and boasts of a strong and active editorial board.

Editors and reviewers are experts in their field and provide anonymous, unbiased and detailed reviews of all submissions. The journal gives the options of multiple language translations for all the articles and all archived articles are available in HTML, XML, PDF and audio formats. Also, all the published articles are archived in repositories and indexing services like DOAJ, CAS, Google Scholar, Scientific Commons, Index Copernicus, EBSCO, HINARI and GALE.

Pediatrics & Therapeutics

Open Access

ISSN: 2161-0665

Editor *Pediatrics & Therapeutics*

Chris A. Maxwell

Scientist Level 1

Child & Family Research Institute

University of British Columbia

Canada

Biography:

Dr. Chris A. Maxwell completed his PhD from the University of Alberta (Canada), followed by postdoctoral studies from Lawrence Berkeley National Laboratory (Berkeley, USA) and the Catalan Institute of Oncology (Barcelona, Spain). He is now an Assistant Professor in the Department of Pediatrics at the University of British Columbia and Scientist within the Child and Family Research Institute.

Research Interest:

His research focuses on the molecular regulators of microtubule organization and centrosome polarity during mitotic spindle assembly, cell polarity, and migration. The goal of his lab is to identify molecular targets and optimize therapies for cancers in children, adolescents, and young adults.
