

OMICS Group

OMICS Group International through its Open Access Initiative is committed to make genuine and reliable contributions to the scientific community. OMICS Group hosts over **400** leading-edge peer reviewed Open Access Journals and organizes over **300** International Conferences annually all over the world. OMICS Publishing Group journals have over **3 million** readers and the fame and success of the same can be attributed to the strong editorial board which contains over **30000** eminent personalities that ensure a rapid, quality and quick review process. OMICS Group signed an agreement with more than **1000** International Societies to make healthcare information Open Access.

OMICS Journals are welcoming Submissions

OMICS Group welcomes submissions that are original and technically so as to serve both the developing world and developed countries in the best possible way. OMICS Journals are poised in excellence by publishing high quality research. OMICS Group follows an Editorial Manager® System peer review process and boasts of a strong and active editorial board.

Editors and reviewers are experts in their field and provide anonymous, unbiased and detailed reviews of all submissions.

The journal gives the options of multiple language translations for all the articles and all archived articles are available in HTML, XML, PDF and audio formats. Also, all the published articles are archived in repositories and indexing services like DOAJ, CAS, Google Scholar, Scientific Commons, Index Copernicus, EBSCO, HINARI and GALE.

Biography

Professor Con Stough is Professor of Cognitive Neurosciences at the Swinburne centre for Psychopharmacology and Professor of Psychology at Swinburne University. The Centre for Psychopharmacology has 20 full time research staff and 20 research students and is a leading research and teaching institute in cognitive neuroscience. He has an extensive track record in research and consulting and has published more than 190 peer reviewed international expert papers in the area of psychological assessment, biological psychology and psychopharmacology. He has also attracted more than 20 million dollars in research grants over the last 10 years from National and International government and Industry sources. Professor Stough is on the advisory panel for the International Society for Intelligence Research and editorial board for the journal *Intelligence and other journals* and is an invited member of the Neuroscience panel for the World Economic Forum. He has reviewed scientific papers for more than 50 different scientific journals
