

OMICS INTERNATIONAL

OMICS International through its Open Access Initiative is committed to make genuine and reliable contributions to the scientific community. OMICS International hosts over **700** leading-edge peer reviewed Open Access Journals and organizes over **1000** International Conferences annually all over the world. OMICS International journals have over **10 million** readers and the fame and success of the same can be attributed to the strong editorial board which contains over **50000** eminent personalities that ensure a rapid, quality and quick review process. OMICS International signed an agreement with more than **1000** International Societies to make healthcare information Open Access.

OMICS Journals are welcoming Submissions

OMICS International welcomes submissions that are original and technically so as to serve both the developing world and developed countries in the best possible way.

OMICS Journals are poised in excellence by publishing high quality research. OMICS International follows an Editorial Manager® System peer review process and boasts of a strong and active editorial board.

Editors and reviewers are experts in their field and provide anonymous, unbiased and detailed reviews of all submissions. The journal gives the options of multiple language translations for all the articles and all archived articles are available in HTML, XML, PDF and audio formats. Also, all the published articles are archived in repositories and indexing services like DOAJ, CAS, Google Scholar, Scientific Commons, Index Copernicus, EBSCO, HINARI and GALE.

Pediatrics & Therapeutics

Open Access

ISSN: 2161-0665

Editor *Pediatrics & Therapeutics*

Elijah Paintsil

Department of Pediatrics
Yale School of Medicine
USA

Biography:

Dr. Elijah Paintsil is an Assistant Professor of Pediatrics and Pharmacology at Yale School of Medicine. He is a board certified Pediatric Infectious Diseases Specialist and attends at Yale-New Haven Children's Hospital. His clinical interests are: the management of drug resistance HIV; prevention of mother to child transmission of HIV and pediatric antiretroviral therapy monitoring in resource limited setting.

Research Interest:

His research focuses on the cellular pharmacology of nucleoside analogs in relation to treatment response – viral suppression, drug toxicity, and evolution of drug resistance. His has ongoing collaborative studies in sub-Saharan Africa to determine the effect of malaria during pregnancy on mother-to-child-transmission of HIV and establish surrogate biomarkers for monitoring HIV therapy and disease progression Pediatric HIV in resource limited setting.
