

OMICS INTERNATION

OMICS International through its Open Access Initiative is committed to make genuine and reliable contributions to the scientific community. OMICS International hosts over 700 leading-edge peer reviewed Open Access Journals and organizes over 1000 International Conferences annually all over the world. OMICS International journals have over 10 million readers and the fame and success of the same can be attributed to the strong editorial board which contains over 50000 eminent personalities that ensure a rapid, quality and quick review process. OMICS International signed an agreement with more than 1000 International Societies to make healthcare information Open Access.

OMICS Journals are welcoming Submissions

OMICS International welcomes submissions that are original and technically so as to serve both the developing world and developed countries in the best possible way.

OMICS Journals are poised in excellence by publishing high

OMICS Journals are poised in excellence by publishing high quality research. OMICS International follows an Editorial Manager® System peer review process and boasts of a strong and active editorial board.

Editors and reviewers are experts in their field and provide anonymous, unbiased and detailed reviews of all submissions. The journal gives the options of multiple language translations for all the articles and all archived articles are available in HTML, XML, PDF and audio formats. Also, all the published articles are archived in repositories and indexing services like DOAJ, CAS, Google Scholar, Scientific Commons, Index Copernicus, EBSCO, HINARI and GALE.

Biography

• Dr. Park is an Assistant Professor of Epidemiology and Environmental Health Sciences at the University of Michigan School of Public Health. Dr. Park received his M.P.H in Environmental Health from Seoul National University in 2000 and a doctoral degree (Sc.D.) in Environmental Epidemiology from the Harvard School of Public Health in 2005. Dr. Parks research focuses on health effects of environmental exposures, such as air pollution, heavy metals, bisphenol-A, and noise, in aging populations. He has a specific interest in geneenvironment and nutrient-environment interactions.

Open Access

• He is also working on the effects of noise and heavy metals on hearing loss and cardio-metabolic diseases using data from the National Health and Nutrition Examination Survey (NHANES) and the Korea National Health and Nutrition Examination Survey (KNHANES). Dr. Park is also interested in epidemiologic methods of life-course data analysis.

Open Access

Park research interest include Epidemiologic research of health effects of air pollution, heavy metals and bisphenol-A, Gene-Environment Interaction, Nutrition-Environment Interaction.

Publications

Urinary Bisphenol A and Type-2 Diabetes in U.S. Adults: Data from NHANES 2003-2008
Monica K. Silver, Marie S. O'Neill, MaryFran R. Sowers, Sung Kyun Park.

Cadmium exposure and cardiovascular disease in the 2005 Korea National Health and Nutrition Examination Survey

Mi-Sun Lee, Sung Kyun Park, Howard Hub, Sundong Lee.
