Market Outlook for Parkinsons Congress 2020

[Parkinsons Congress 2020](#) focuses on broad array of disorders and cure of brain and connecting neurons. According to the latest survey conducted by WHO, it is revealed that [Neurological Disorders](#) encompassing Stroke, Alzheimer & Dementia, Epilepsy and many more accounts for more than 12% of deaths worldwide on an average and it is also predicted that the number of disability –adjusted life years vanished due to Neurological disorders are expected to accelerate from 95 million globally in 2015 to 103 million by 2030. Moreover, the worldwide cost of neurological sequel solitary estimated in 2010 was US\$ 2.5 trillion and it is assumed that the value will spike to over US\$ 6 trillion by 2030.

Neurology today holds a position in the various medical centres of the world which varies from complete nonexistence to high and complex development.

Invasion of the field of neurology by different types of clinicians, the rapid development of psychiatry, the late appearance of neurosurgery and the important recent advances in neurophysiology and neuro-anatomy, all help to account for this variability and demand a reconsideration of the scope of neurology. A survey of neurology, neurosurgery and neuropathology as they are to be found in various centres of learning today supports this view. From the time that neurology first emerged as a specialty, it has suffered a progressive reduction in scope.

The global [Neuromarketing technology](#) Market is expected to reach USD 100 million by 2023 growing at a 12% CAGR over the forecast period 2017-2023.

Neuromarketing technology is further divided on the basis of end user that includes retail, healthcare, food & beverage, and consumer electronics.

In this fame, we look forward for your contribution and astonishing dedication. We believe your membership in [Parkinsons Congress 2020](#) during **October 21-22, 2020** in **Paris, France** will enhance the success of the conference.
