Dr. Syed Raza

Consultant Cardiologist, Head of the Department of Medicine, Awali Hospital, Bahrain, E-mail: syedraza621@gmail.com

We welcome you to attend the “[2nd World Cardiology and Cardiac Rehabilitation Meeting](#)” from **July 01-02, 2020** at **Athens, Greece** which melds brief Keynote presentations, Speaker talks, Exhibition, Symposia, Workshops, and Special sessions.

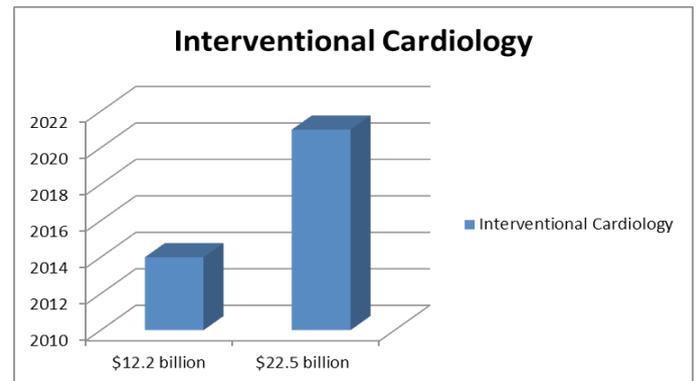

Market Analysis:

[Heart disease](#) describes a range of heart-related conditions. Diseases under the umbrella of heart disease include diseases of the blood vessels, such as coronary artery disease, heart rhythm problems (arrhythmias), and heart defects, such as congenital heart defects, rheumatic heart disease, hypertensive heart disease, ischemic heart disease, hypertension, and much more. Every year, 3.9 million deaths are caused by cardiovascular disease (CVD) in Europe and more than 1.8 million deaths in the European Union. According to the World Health Organization (WHO) and the CDC, cardiovascular disease accounts for 45% of all deaths in Europe and 37% of all deaths in the EU.

In 2014, the worldwide [cardiology mediation](#) programming market arrived at an expected \$12.2 billion. As per another investigation by Smithers Apex –The future of [coronary artery disease](#) medical devices to 2021 –it will develop to **\$22.5 billion (€20.9 billion)** by 2021, with a year-on-year increment of

9.1%. Demand for coronary vein infection restorative gadgets will develop through 2021 as clinically suitable and practical arrangements are created. The investigation tends to three primary fragments of the market for cardiological medical procedure, gadgets, and medications, in particular medical procedure, gadgets, and medications. Cardiovascular infections are the main source of death universally. Coronary illness, stroke, [hypertensive coronary illness](#), fiery coronary illness, rheumatoid coronary illness, and others are a portion of the principle CVDs. The main source of death joined by strokes is coronary illness. Coronary illness commonness and frequency rate are on the ascent, particularly in major developing nations, for example, India, China, and Japan. There is likewise an expansion in the market for cardiological medical procedure, hardware and drugs.
