

## 26<sup>th</sup> Global Conference on Nursing Education and Registered Nurse-Market Analysis

Dr. Jamews Okeya

A.I.C Kijabe hospital, as a critical care nurse-in pediatric ICU. In Nairobi, Kenya, E-mail: jamesoreng1@gmail.com

**Veterinary Congress 2020** scheduled at Sydney during October 12-13, 2020 Hanoi, Vietnam The “11th World Congress on Veterinary & Animal Science” hosted by conference series with the theme, “*Current Trends in Veterinary and Animal Science*” was successfully executed during October 18-19, 2019 Bangkok, Thailand. The conference offered a unique opportunity to investigators across the globe in order to meet, explore, network and perceive new scientific innovations. The conference received commendable and active participation was received from the Editorial Board Members of OMICS Group Journals as well as from the global scientists, Professors, Academicians, Researcher Scholars and students from diverse fields of Veterinary Care and Veterinary Surgery.

Conference series is organizing “**International Conference on Advance Clinical Veterinary & Veterinary Care**” which is going to be held on October 12-13, 2020 Hanoi, Vietnam. The conference is going to cover the entire field related to [Veterinary Toxicology](#), [Veterinary Care & Management](#) latest research and findings. The Conference will provide a platform where research scholars and students will be able to gain knowledge about new, innovative research and findings from the eminent Scientist, Researchers and Professors.

This veterinary conference focuses on the exponential growth taking place in the veterinary sector. Veterinary medicine has responsibilities in biomedical research; ecosystem management; public health; food and agricultural systems; and care of companion animals, wildlife, exotic animals, and food animals. The veterinary profession contributes to improvement of human and public health by improving agriculture and food systems, advancing biomedical and comparative medical research, preventing and addressing zoonotic diseases, enhancing environmental and ecosystem health, and helping manage 21st century public health challenges.

Most veterinary physicians work in clinical settings, treating animals directly. These veterinarians may be involved in a general practice, treating animals of all types; they may be specialized in a specific group of animals such as companion animals, livestock, zoo animals or equines; or may specialize in a narrow medical discipline such as

surgery, dermatology or internal medicine. As with other healthcare professionals, veterinarians face ethical decisions about the care of their patients. Current debates within the profession include the ethics of certain procedures believed to be purely cosmetic or unnecessary for behavioral issues, such as declawing of cats, docking of tails, cropping of ears and debarking on dogs.

### The Conference Highlights of 2020 are as follows:

Veterinary Medicine, Animal Biotechnology, Veterinary Physiotherapy, Veterinary Forensics, Veterinary Nursing, Animal Models & Testing, Animal Nutrition, Veterinary Care & Management.
