Conferenceseries LLC Ltd is all set to focus its attention on the global public health concerns. Conferenceseries LLC Ltd scheduled 1000+ annual [scientific conferences](#), 2000+ International workshops, seminars, exhibitions and symposia for 2017. Conferenceseries LLC Ltd [Nursing conferences](#) would offer a powerful global forum to encourage dialogue on the advancements related to prevention, cure and rehabilitation of Nursing

May 17, 2019 (The Expresswire via COMTEX) -- Global Nursing Care Market, analyzes and researches the Instant Payments development status and forecast in United States, EU, Japan, China, India and Southeast Asia. This report focuses on the top players in global market.

In 2018, the global Nursing Care market size was xx million US\$ and it is expected to reach xx million US\$ by the end of 2025, with a CAGR of xx% during 2019-2025. This report focuses on the global Nursing Care status, future forecast, growth opportunity, key market and key players. The study objectives are to present the Nursing Care development in United States, Europe and China.

The Global Nursing Care market 2019 research provides a basic overview of the industry including definitions, classifications, applications and industry chain structure. The Global Nursing Care market analysis is provided for the international markets including development trends, competitive landscape analysis, and key regions development status. Development policies and plans are discussed as well as manufacturing processes and cost structures are also analyzed. This report also states import/export consumption, supply and demand Figures, cost, price, revenue and gross margins.

Global Nursing Care Industry 2019 Market Research Report is spread across 95 pages and provides exclusive vital statistics, data, information, trends and competitive landscape details in this niche sector.

Inquire more or share questions if any before the purchase on this report @

Global Nursing Care market competition by top manufacturers, with production, price, and revenue (value) and market share for each manufacturer; the top players including

- ✓ Emeritus
- ✓ Genesis Healthcare
- ✓ Life Care Centers for America
- ✓ Kindred Healthcare
- ✓ Extencare

The report also focuses on global major leading industry players of Global Nursing Care market providing information such as company profiles, product picture and specification, capacity, production, price, cost, revenue and contact information. Upstream raw materials and equipment and downstream demand analysis is also carried out. The Global Nursing Care market development trends and marketing channels are analyzed. Finally the feasibility of new investment projects are assessed and overall research conclusions offered.

With tables and figures helping analyze worldwide Global Nursing Care market, this research provides key statistics on the state of the industry and is a valuable source of guidance and direction for companies and individuals interested in the market.

Nursing meetings, unveiling the recent innovations in nursing research. These presentations are open to all types of research approaches both from academia as well as industries. Significant features of these scientific events are the well-structured scientific sessions, research presentations on recent researches, workshops, symposia and B2B meetings among Academicians, Researchers and Industry key leaders. Besides that Poster Presentations, Young Researchers Forum and Live streaming of the talks connects the scientific world together and brings them all beneath a single roof.

The current total population of residents 65 and older, according to the 2000 U.S. Census, is 155,071 in Middlesex County, and 857,183 for the same group in nearby Hartford County. (The percentage of elderly in both counties is slightly higher than the 12.4% of the overall Connecticut population.) Our projections reduce that

number by 70% to account for those healthy enough to care for themselves, or with family members able to care for them, leaving us with a total potential market of 303,676. We then reduce that number again by half to get the total potential customers living within a 35 minute drive of Middletown (these are small counties, and we are situated at their juncture), leaving us with 151,838. Of these, we estimate roughly 8.5% will have the means (\$150,000 or more family income) to pay for full-time private care at our facility (based on the 2000 census data about Connecticut income).

This leaves us with roughly 12,906 nearby upper-income residents of Hartford and Middlesex County who are 65 or older, and in need of medical or other daily assistance in their living situation. To project into the future, we again looked to the 2000 Census. The Census' Projected Population of Connecticut is as follows:

1995	2000	2005	2015	2025
467,000	461,000	456,000	526,000	671,000

While the overall population of Connecticut is projected to decline over the next five years, before rising again, we know that the proportion of the overall population age 75 and older (our target market age) is slowly rising. We therefore include a modest projected increase in potential customers of 1% over the next five years.

Medicare residents and short stays

A study published recently in the journal Health Affairs by Morrissey, Sloan, and Valvona found that the proportion of Medicare patients transferred to post-hospital care has doubled since the Prospective Payment System (PPS) was introduced. Rather than staying in the hospital until recuperated, the current system preferentially delegates recovery care to private non-hospital facilities, leaving room in hospitals for urgent or crisis care. We base our projections for Medicare residents on the same figures listed above, but looking at the percentage of elderly with family incomes between \$30,000 and \$75,000 dollars,* rather than just the highest bracket, we get 40% of the population, or 60,735. We apply the same conservative 1% growth rate, below.

*This income range was chosen because it correlates with the kind of higher education levels that most families choosing non-hospital model skilled nursing care report. Although residents with lower incomes may have a need for our service, they are traditionally less likely to seek out alternative care.

Market Analysis (Pie)
