

## Addiction quick point in Singapore

Laxmi Prasad Thapa

Director at Himalaya Research Institute of Biotechnology Pvt Ltd

Addiction is a complex condition, a brain disease that is manifested by narcotic substance use despite harmful consequence. People with have an intense focus on using a certain substance, such as alcohol or narcotic drugs, to the point that it takes over dangerous their life. They keep using alcohol or a drug even when they know it will cause problems. There are several effective treatments are available, and people can recover from addiction and lead normal, productive lives.

[Singapore](#) is a multi-cultural city; different ethnic communities live and work together in Singapore. [Singapore](#) is leading the way in the development of several industries in South East Asia, with a focus on science, pharmacy and health care. [Singapore](#) is a major key drug market for pharmaceutical companies. Its pharmaceutical market was estimated to be about \$820 million. It is expected to grow at a steady rate of 6%, compared to the 5% average growth in the Asia-Pacific region.

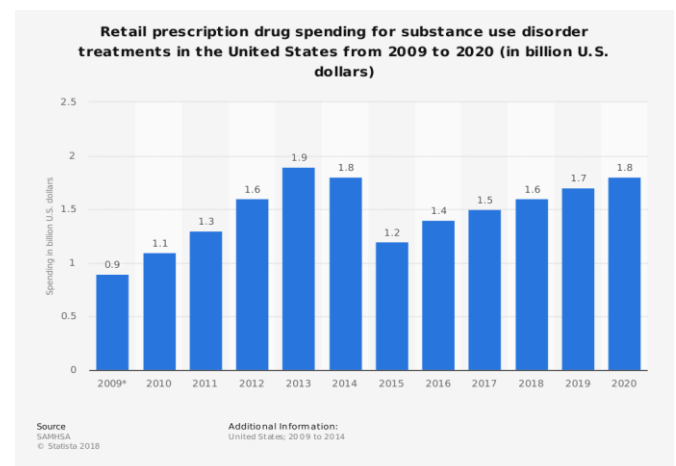

Addiction research in Singapore is provided through universal [Addiction](#). This system is available for free to all citizens and even to the people who are non-local and staying in Singapore for more than one year. Free screening processes for certain diseases, infectious disease control, and prenatal care is available in [Singapore](#). They accept the responsibility that the patients should pay 30% of these costs while the government pays the remaining 70%. Medical services are offered with special medical insurance from the government.

All the [Singapore](#) occupants have the medical coverage inclusion. In the event that they don't have medical coverage they can take an interest in a national medical coverage program created by nearby governments. Patients are allowed to choose doctors or offices of their decision and can't be denied inclusion.

In the previous five decades, [Singapore](#) has accomplished countless wellbeing victories. These incorporate the full usage of all-inclusive protection inclusion, developing the world's most elevated solid future, and the control and even destruction of basic irresistible infections. Also, liquor utilization and transport mishap passing have diminished

considerably in the course of recent years. Notwithstanding these accomplishments, the nation faces numerous auxiliary difficulties, including negative populace development, a maturing populace, low ripeness, a contracting economy, expanding joblessness, and an expanding NCD-related sickness trouble. What's more, despite the fact that the general future and sound future have been expanding in Japan, there are expanding variations among prefectures, exhibiting a requirement for area explicit wellbeing strategies.

We feel glad to announce our upcoming event on "[10th International Conference on Addictive Disorders and Alcoholism](#)" "March 25-26, 2020 Singapore".
