

## Awards Content for Soil Science 2020

**Dr. Ernesto Lopez-Baeza**

*Associate Professor, Department of Applied Physics, University of Valencia, Spain, E-mail: Ernesto.Lopez@uv.es*

Soil science is the study of soil as a natural resource on the surface of the Earth including soil formation, classification and mapping; physical, chemical, biological, and fertility properties of soils; and these properties in relation to the use and management of soils. Sometimes terms which refer to branches of soil science, such as pedology (formation, chemistry, morphology, and classification of soil) and edaphology (how soils interact with living things, especially plants), are used as if synonymous with soil science. The diversity of names associated with this discipline is related to the various associations concerned. Indeed, engineers, agronomists, chemists, geologists, physical geographers, ecologists, biologists, microbiologists, silviculturists, sanitarians, archaeologists, and specialists in regional planning, all contribute to further knowledge of soils and the advancement of the soil sciences. Soil scientists have raised concerns about how to preserve soil and arable land in a world with a growing population, possible future water crisis, increasing per capita food consumption, and land degradation.

### Expert Level

The award is considered the most distinguished award in the whole conference and it is termed as Scientific Service Achievement Award. The award will recognize research contributions in a significant field rather than a single project or contribution. The researchers should have a minimum of 20 years of research experience in the respective field. The anticipatory awardee should be passionate towards their work, willing to innovate and accept the aberrations happening in the research area with the introduction of recent trends. You can nominate anyone you feel deserving to the award.

### Professional Level

The award will be presented to professional researchers in the field of Soil Science with most relevant accomplishments. The award honors qualitative, quantitative, experimental research or case study research that investigates the aspect of Soil Science. The award is termed as The Research

Contribution Award. The researchers should have a minimum of 10 years of experience in academic or professional research. Part-time research experience would be counted as a pro rata. Doctorate degree is not a must have for this award nominees. They should be hard working, diligent, focused and devoted to the specific field of interest. You can nominate anyone you feel deserving to the award.

Soil Science 2019 supported by the organizing committee network of renowned scientific and professional expert such as **Dr. Ernesto Lopez-Baeza, University of Valencia, Spain**, provided a platform for collaboration among colleagues, vendors, and academia to reveal new innovations, solutions, ideas, and emerging technologies in Soil Science.

There are more than Aprox.7 billion individuals on Earth now, and approximately one in eight of us doesn't have enough to eat. The subject of what number of individuals the Earth can support is a long-standing one that turns out to be more exceptional as the total populace—and our utilization of normal assets. The agrarian testing market, in view of test sort, incorporates soil, water, fertilizer, compost, bio-solids, seed, and others. The produced soils market is anticipated to achieve USD Aprox. 8.2 Billion by 2021, at a CAGR of 6.7% from 2016 to 2021. The development of this market is credited to the expanding interest for natural items, the expanding worldwide populace, enhanced yield and profitability, and expanding pattern towards present day cultivating practices, for example, controlled agribusiness and urban cultivating.

Earth Science Conferences going to be held during January, 2020 to December, 2020 at various cities in Europe (London, Barcelona, Madrid, Valencia, Rome, Milan, Berlin, Frankfurt, Vienna, Zurich, Dublin, Edinburgh.... And Many More...!!!
