## Awards for Earth & Environmental Science Conference.

**Bassem Nassouhy***General Manager, Scientific Business Solutions Group UAE, E-mail: bassem.nassouhy@gmail.com*

Earth Science is the study of the Earth and its neighbors in space. It is an exciting science with many interesting and practical applications. Some Earth scientists use their knowledge of the Earth to locate and develop energy and mineral resources. Others study the impact of human activity on Earth's environment, and design methods to protect the planet. Some use their knowledge about Earth processes such as volcanoes, earthquakes, and hurricanes to plan communities that will not expose people to these dangerous events. Many different sciences are used to learn about the Earth; however, the four basic areas of Earth science study are: geology, meteorology, oceanography, and astronomy. A brief explanation of these sciences is provided below. Geology is the primary Earth science. The word means "study of the Earth." Geology deals with the composition of Earth materials, Earth structures, and Earth processes. It is also concerned with the organisms of the planet and how the planet has changed over time. Geologists search for fuels and minerals, study natural hazards, and work to protect Earth's environment.

### Expert Level (Scientific Service Achievement Award)

The purpose of Scientific Service Achievement Award awards is to recognize outstanding research achievements in the area of Earth & Environmental Science. The applicants should have minimum of 20+ years of experience in the relative field in public or private sector. The applicants are expected to enhance the quality of research should take lead in researching the current trends and developments towards the related subjects. The applicants can be nominated through online.

### Professional Level (The Research Contribution Award)

The Research Contribution Award is for highly experienced professional (10+ years) who has made significant discoveries, made important advances in his or her chosen career path in the area of Earth & Environmental Science in the public or private sector. Part-time research experience would be counted as pro-rata. It is calculated starting from the date when you

obtained the (first) degree entitling you to embark on a doctorate (either in the country in which the degree was obtained or in the country in which the researcher is recruited), even if a doctorate was never started or envisaged. The applicants can be nominated through online.

Earth & Environmental Science 2020 supported by the organizing committee network of renowned scientific and professional expert such as Dr. Bassem Nassouhy, General Manager, Scientific Business Solutions Group UAE provided a platform for collaboration among colleagues, vendors, and academia to reveal new innovations, solutions, ideas, and emerging technologies in Environmental Science.

Air and water pollution are major environmental problems in the Beijing and around the world, including water, air and soil contamination due to the incorporation or replacement of new compositions, which could lead to a drastic change in their nature and could even lead to depletion and deterioration of existing natural materials. The Pollutants basically consists of heavy metals, organic compounds, nitrates and phosphates.

According to the European Environment Agency, Italy has the highest number of premature deaths from nitrogen dioxide air pollution as compared to any country in the EU. In 2013, the agency reported last year, the toxic gas mainly from diesel fumes killed over 21,000 people in Italy.

By the mid - October Beijing cities had already exceeded EU air quality standards, specifying that cities should have no more than 35 "bad air" days – when PM10 pollution levels exceed micrograms per cubic meter of air – per year.

Environmental Conferences going to be held during January, 2020 to December, 2020 at various cities in Europe (London, Barcelona, Madrid, Valencia, Rome, Milan, Berlin, Frankfurt, Vienna, Zurich, Dublin, Edinburgh.... And Many More..!!!
