

## Biodiesel 2020 Report

We delightfully invite all the participants across the world to attend the Webinar on Biodiesel which aims for “Production of Biodiesel from Used Cooking Oil (UCO)”, to be held during August 11, 2020 at 10:00 AM (UTC +5:30). Our main motto is to unify individuals in the scholarly community and society keen on Biodiesel to deliver their talks on the current trends and significant issues related to research important for the public to be shared. Biodiesel webinar acquires a wide platform for students, Academic Professors, Researchers, Young Researchers, Business Delegates to exchange ideas and knowledge.

The global Biomass Energy market was million US\$ in 2018 and is expected to million US\$ by the end of 2025, growing at a CAGR of between 2019 and 2025. Over the years to come, biomass will grow within the biopower, biofuels, and bioproduct sectors. The market value of electricity generated from biomass in the U.S. was \$45 billion in 2010 and will increase to \$53 billion by 2020. According to the BPA (Biomass Power Association), the biomass industry produces 5 million megawatt-hours of electricity every year, provides 18,000 jobs nationwide, and removes more than 68.8 million tons of forest debris every year.

Jung Chang Wang, Professor, Marine Engineering (DME), Taiwan

The meeting reflected various sessions, in which discussions were held on the following major scientific tracks:

Scientific session/tracks:

- Advances in Renewable Chemicals
- Biodiesel
- Biomass
- Sustainability:
- Bioheat
- Bioethanol
- Biofuels
- Biorefineries
- Biochar

With the grand success of Biodiesel 2019, Meetings international is proud to announce the “Webinar on Biodiesel” to be held during September 20, 2020 at Dubai, UAE.
